SOFTWARE ENGINEER-SECURITY+ CERTIFIED

Software Development – Cybersecurity – API Testing – Technical Troubleshooting

Technically savvy software and security engineer with extensive experience in professional software development, product support engineering, and quality assurance. Proven ability to adapt quickly to new technologies and environments, consistently expanding technical breadth and depth to deliver secure, high-quality solutions.

EDUCATION & CERTIFICATIONS

Masters of Computer Science, ***Bridgewater State University (BSU)***, Bridgewater, Massachusetts, 2025

CompTIA Security+ Certification, ***CompTIA***, 2024

Bachelor of Science in Software Engineering, ***University of Nottingham***, Semenyih, Selangor, 2018

TECHNICAL PROFICIENCIES

ROS, Golang/Fyne, Log Audits, PHP, Laravel and Lumen, PHPUnit, Elixir and Exunit, Phoenix Web Framework, Python and Django, Redis, Git, RabbitMQ, React and React-Native, Adobe Experience Manager, Linux Administration, Docker, Amazon EKS, JavaScript, SOLID Principles, API Testing, Test Automation, C#, ASP.net, .netCore, Java, CISCO IOS networking, ROS, Numpy, (ETL Pipeline)Glue Jobs, AWS Lambda, AWS CDK, Terraform, PySpark.

Microsoft Exchange, Intune MDM, Azure, Active Directory, SCCM.

PROFESSIONAL EXPERIENCE

Bridgewater State University, Bridgewater, Massachusetts **2024 - Present**

Software Consultant ***08/2025 – Present***

- **Designed** and implemented a **Python-based recursive web crawler** for the graduate communications team.
- **Applied** domain-restricted crawling, table-level filtering, and request hardening to prevent crawler drift.
- **Parsed** and normalized semi-structured HTML into a relational database using SQLAlchemy, enabling scalable querying and analysis.
- **Automated** collection of data, reducing manual research effort from days to minutes.

Graduate Assistant ***01/2024 – 12/2025***

- **Standardized** device provisioning, compliance, and application delivery across client environments.
- **Managed** enterprise endpoint configuration, deployment, and lifecycle management using Intune, SCCM, and Reftab.
- **Collaborated** with the director and executive director to develop the enterprise package management strategy, improving software deployment consistency.
- **Partnered** on the implementation of Universal Print, modernizing printing workflows and reducing on-prem operational overhead.

Prince George's Community College, Largo, Maryland **2023 - 2024**

Academic Tutor ***05/2023 – 01/2024***

- **Offered** technical support and guidance to students, helping them navigate academic challenges and providing solutions to enhance their understanding and performance in various subjects.
- **Guided** and helped the students improve their study habits and organizational skills.
- **Utilized** computer-aided teaching techniques and educational technologies to enhance the students' grasp of complex technical concepts.
- **Elevated** student academic performance by implementing innovative tutoring strategies, resulting in an average grade improvement of 15% in their math grades.

Safe-Boda, Kampala, Uganda **2019 - 2023**

PHP Developer ***08/2021 – 05/2023***

- **Collaborated** with DevOps to implement our blue-green strategy deployment using Argo-rollouts on Amazon EKS that reduced our downtime by 70%.
- **Developed** and maintained Safe-Boda's ride-management system using modern industry best practices, development techniques, and security considerations.
- **Refactored** our billing codebase, transitioning the system from a monolithic to microservices architecture and aligning it with current industry standards, increasing our utilization of our payments vendor by 40%.
- **Resolved** longstanding RabbitMQ service issues and designed a cutting-edge solution, enabling the business to process bulk transactions efficiently for diverse client needs.
- **Enhanced** and updated the PHP legacy API, enabling the company to manage customer access to the Airtime feature.

Senior Product Support Engineer ***08/2020 – 8/2021***

- **Managed** client technical support requests and maintained communication with clients during the development and support phases.
- **Conducted** extensive troubleshooting to investigate, test, and document defects and bugs based on user feedback and proactive system monitoring.
- **Trained** Product Support Associates in resolving complex, time-sensitive technical issues, reducing the workload on engineers.
- **Streamlined** technical support operations by enhancing our support team's technical capabilities through efficient troubleshooting protocols using Retool dashboards and knowledge sharing across the Quality Assurance and Product Support teams.

Quality Assurance Engineer - API ***01/2019 – 8/2020***

- **Conducted** regular testing of diverse REST endpoints serving applications and back-office dashboards to guarantee functionality and optimal system performance without regression.
- **Collaborated** with developers in drafting effective test plans for upcoming features during the requirements gathering phase.
- **Automated** REST endpoint black box tests using Postman, front-end tests of vue using Playwright, significantly accelerating the testing phase of the software development process from a day to an 30 mins.

ADDITIONAL EXPERIENCE

Driver Support Associate & IT Intern - SafeBoda

Tech Team Intern, APD Digital Services - APD Digital Services, Kuala Lumpur
